2

5. Format the memory card

1. With gold contact facing up, insert the memory card into ⑤.
2. With device powered off, press and hold ③ and then press ① for 3 seconds to power on the device.
3. When you see the red blinking LED and blue LED goes off, the formatting is completed.

Note: To make sure the memory card can be read by the computer, please format the memory card before using it for the first time. Also, please note that formatting on computer is highly not recommended, for it might result in the failure of formatting.

6. Date and time setting (for windows system)

1. From the desktop right-click to open Notepad, create a text file named **settime.txt**
2. On the first line of the file, enter date and time information as year.month.day hours.minutes.seconds. For example, suppose the time is October 16, 2015 15:00. Then, please enter **2016.10.16 15:00:00**

Note: There should be a space left between day and hours, and the time format should be the 24-hour format.

3. Save the file to the root directory of the memory card.
 4. Insert the memory card into the slot, and power on the device. The date and time setting is now completed.
- Note:** When the date and time setting is completed. The **settime.txt** file will not be visible when you connect the device to the computer again.
